

Innovative therapies for skin diseases

Maximising value of your preclinical assets to find a breakthrough therapy for patients

Our aim

We are looking for partnering opportunities on new assets (new chemical entities, biologics and other advanced therapies) in late research or preclinical stages, that address a specific pathway and with a sound rationale for the treatment of [dermatological conditions](#).

Assets should demonstrate *in vitro* and *in vivo* evidences of efficacy as well as suitable pharmacokinetic and toxicological profile for the selected disease and route of administration.

Who is this for

This call is addressed to scientists affiliated to start-ups, biotechs, Universities, Research Centres, and pharmaceutical companies all over the world.

Collaboration framework

- Submitted proposals may be eligible for
 - A late Research or Preclinical partnership
 - Asset characterisation by Almirall in a pre-agreed panel of relevant cellular assays and *in vivo* models of the selected dermatological disease. This panel could be complemented with pharmacokinetic and toxicological profiling
 - A long-term business opportunity
- Intellectual property rights remain with the applicant
 - You will retain ownership of any intellectual property you may bring or develop
- A designated contact person will help you on answering your questions

Collaboration process

- Proposal submission
 - The first step is for you to create an account in [AlmirallShare Innovation platform](#) which is a secure site to store and manage your proposals
 - The submission period is from July xxx, 2020 to October 31st, 2020
 - Please include an outline of your proposal (max. 300 words) and a detailed description of asset modality, pharmacological, pharmacokinetic and safety profile, as well as current development stage
 - All the initial information provided under the proposal should be non-confidential.
- Submissions will be handled following all applicable local compliance rules
- Proposal evaluation and selection
 - A team of Almirall scientific experts will evaluate your proposal as soon as it will be received
 - You will receive in writing Almirall's decision regarding your proposal within 4-8 weeks after submission
 - If your proposal has been selected, a member of the AlmirallShare Team will contact you to initiate a partnership agreement that will reflect a collaborative proposal, including eventual experimental activities, and a business proposal according to current development phase
